PROGRESS IN ORGANIC COATINGS

Subject Index of Volume 28

Acid–base interaction
  stabilization of the polymer–metal interface, 9
  dispersion characteristics of magnetic particles: surface charge, surface adsorption and acid–base interaction behavior, 307
Acid rain resistance
  thermal cationic curing with benzylammonium salts — 2, 143
A.c. impedance
  evaluation of heat resistant properties of silicone based coatings by SEM and a.c. impedance techniques, 113
Acrylated
  acrylated lesquerella oil in ultraviolet cured coatings, 299
Acrylic resins
  pigment dispersion in water-reducible paints, 79
Adhesion
  thin-layer technology in organic coatings, 3
  stabilization of the polymer–metal interface, 9
  on adhesion and stress in organic coatings, 21
  surface chemistry of galvanized steel sheets relevant to adhesion performance, 227
Adsorbed polymers
  determination of the restricted segmental mobility dimensions of adsorbed polymers, 17
Alkyd resin
  studies on the stability of aqueous emulsions containing linseed oil and alkyd resin modified by linseed oil, 125
Anodic undermining
  corrosion mechanisms of phosphated zinc layers on steel as substrates for automotive coatings, 59
Aqueous dispersions
  pigment dispersion in water-reducible paints, 79
ATR-FTIR spectroscopic techniques
  vibrational spectroscopic study of distribution of sodium dodecyl sulfate in latex films, 279
Autoxidation
  differential scanning calorimetry study of linseed oil cured with metal catalysts, 251

Borchardt and Daniels method
  differential scanning calorimetry study of linseed oil cured with metal catalysts, 251

Capacitance
  a capacitance study of pseudo-fickian diffusion in glassypolymer coatings, 239
Cathodic delamination
  corrosion mechanisms of phosphated zinc layers on steel as substrates for automotive coatings, 59
Coating
  the levelling of thixotropic coatings, 89
Coil coating
  surface chemistry of galvanized steel sheets relevant to adhesion performance, 227

Elsevier Science S.A.

Corrosion
  thin-layer technology in organic coatings, 3
  filiform corrosion in polymer-coated metals, 49
  corrosion mechanisms of phosphated zinc layers on steel as substrates for automotive coatings, 59
  evaluation of the behaviour of particulate polymeric coatings in a corrosive environment. Influence of the concentration of metal particles, 117
Corrosion control
  reflections on corrosion control by organic coatings, 43
Corrosion current
  optimisation of metallic pigments in coatings by an electrochemical technique and an investigation of manganese powder as pigment formetal rich primers, 271
Corrosion protection
  stabilization of the polymer–metal interface, 9
  a positron annihilation lifetime spectroscopic study of the corrosion protective properties of epoxy coatings, 97
  corrosion protection of cold-rolled steel by low temperature plasma interface engineering. I. Enhancement of E-coat adhesion, 291
Cosmetic corrosion of zinc
  corrosion mechanisms of phosphated zinc layers on steel as substrates for automotive coatings, 59
Critical pigment volume concentration
  latex particle size and CPVC, 259
Crosslinkable acrylic latexes
  synthesis of crosslinkable acrylic latexes by emulsion polymerization in the presence of etherified melamine-formaldehyde (MF) resins, 133
Crosslinking
  thermal cationic curing with benzylammonium salts — 2, 143
  differential scanning calorimetry study of linseed oil cured with metal catalysts, 251

Differential scanning calorimetry
  differential scanning calorimetry study of linseed oil cured with metal catalysts, 251
Dispersion characteristics
  dispersion characteristics of magnetic particles: surface charge, surface adsorption and acid–base interaction behavior, 307
Drier
  differential scanning calorimetry study of linseed oil cured with metal catalysts, 251
Drying oil
  differential scanning calorimetry study of linseed oil cured with metal catalysts, 251

Emulsion polymerization
  synthesis of crosslinkable acrylic latexes by emulsion polymerization in the presence of etherified melamine-formaldehyde (MF) resins, 133

Epoxy coatings
a positron annihilation lifetime spectroscopic study of the corrosion protective properties of epoxy coatings, 97
Epoxy functional acrylic resins
thermal cationic curing with benzylammonium salts — 2, 143
Epoxy resins
formulation parameters influencing self-stratification of coatings, 193
European Community Research
statistical treatment of data from the European Community Research on self-stratification, 209
European Community Research Project
self-stratifying coatings — an overview of a European Community Research Project, 203
Evaporation rate
theoretical aspects of self-stratification, 155

Field flow fractionation
field flow fractionation for particle size determination, 25
Filiform corrosion
filiform corrosion in polymer-coated metals, 49
Fillers
field flow fractionation for particle size determination, 25
Film forming behaviour
microgels in organic coatings, 33
Flow
pigment dispersion in water-reducible paints, 79

Galvanic current
optimisation of metallic pigments in coatings by an electrochemical technique and an investigation of manganese powder as pigment formetal rich primers, 271
Galvanized steel
surface chemistry of galvanized steel sheets relevant to adhesion performance, 227
Glassy polymer coatings
a capacitance study of pseudo-fickian diffusion in glassypolymer coatings, 239
Gloss
pigment dispersion in water-reducible paints, 79

Heat resistant coating
evaluation of heat resistant properties of silicone based coatings by SEM and a.c. impedance techniques, 113
High-solids coatings
thermal cationic curing with benzylammonium salts — 2, 143

Incompatibility of resins
formulation parameters influencing self-stratification of coatings, 193
Interface engineering
corrosion protection of cold-rolled steel by low temperature plasma interface engineering. I. Enhancement of E-coat adhesion, 291
Interfacial chemistry
surface chemistry of galvanized steel sheets relevant to adhesion performance, 227
Internal stress
internal stress and wet adhesion of organic coatings, 285

Latent acids
thermal cationic curing with benzylammonium salts — 2, 143
Latex film formation
vibrational spectroscopic study of distribution of sodium dodecyl sulfate in latex films, 279
Latex particle size
latex particle size and CPVC, 259
Latices
field flow fractionation for particle size determination, 25

Lesquerella oil
acrylated lesquerella oil in ultraviolet cured coatings, 299
Levelling
the levelling of thixotropic coatings, 89
Linseed oil
studies on the stability of aqueous emulsions containing linseed oil and alkyd resin modified by linseed oil, 125
Low temperature plasma processes
corrosion protection of cold-rolled steel by low temperature plasma interface engineering. I. Enhancement of E-coat adhesion, 291

Magnetic particles
dispersion characteristics of magnetic particles: surface charge, surface adsorption and acid–base interaction behavior, 307
Manganese rich primer
optimisation of metallic pigments in coatings by an electrochemical technique and an investigation of manganese powder as pigment formetal rich primers, 271
Mechanical delamination
corrosion mechanisms of phosphated zinc layers on steel as substrates for automotive coatings, 59
Mechanical properties
microgels in organic coatings, 33
Melamine-formaldehyde resins
synthesis of crosslinkable acrylic latexes by emulsion polymerization in the presence of etherified melamine-formaldehyde (MF) resins, 133
Metal
acrylated lesquerella oil in ultraviolet cured coatings, 299
Metal catalysts
differential scanning calorimetry study of linseed oil cured with metal catalysts, 251
Metal polymer joints
surface chemistry of galvanized steel sheets relevant to adhesion performance, 227
Microgels
microgels in organic coatings, 33

Organic coatings
on adhesion and stress in organic coatings, 21
reflections on corrosion control by organic coatings, 43

Paint adhesion
corrosion protection of cold-rolled steel by low temperature plasma interface engineering. I. Enhancement of E-coat adhesion, 291
Paint film
the levelling of thixotropic coatings, 89
Particle size
field flow fractionation for particle size determination, 25
Particulate polymeric coatings
evaluation of the behaviour of particulate polymeric coatings in a corrosive environment. Influence of the concentration of metal particles, 117
Phase separation
theoretical aspects of self-stratification, 155
self-stratifying coatings for metallic substrates, 167
Physical crosslinking
microgels in organic coatings, 33
Physically drying binders
formulation parameters influencing self-stratification of coatings, 193
Pigment dispersion
pigment dispersion in water-reducible paints, 79
Pigments
field flow fractionation for particle size determination, 25

Pigment volume concentration
optimisation of metallic pigments in coatings by an electrochemical technique and an investigation of manganese powder as pigment formetal rich primers, 271
Plastic substrates
self-stratifying coatings for plastic substrates (BRITE EURAM PROJECT RI 1B 0246 C(H)), 179
Polymer-coated metals
filiform corrosion in polymer-coated metals, 49
Positron annihilation lifetime spectroscopy
a positron annihilation lifetime spectroscopic study of the corrosion protective properties of epoxy coatings, 97
Protective coating
evaluation of heat resistant properties of silicone based coatings by SEM and a.c. impedance techniques, 113
Protective coatings
optimisation of metallic pigments in coatings by an electrochemical technique and an investigation of manganese powder as pigment formetal rich primers, 271
Pseudo-fickian diffusion
a capacitance study of pseudo-fickian diffusion in glassypolymer coatings, 239

Reaction kinetics
differential scanning calorimetry study of linseed oil cured with metal catalysts, 251
Relaxation
a capacitance study of pseudo-fickian diffusion in glassypolymer coatings, 239
Restricted segmental mobility
determination of the restricted segmental mobility dimensions of adsorbed polymers, 17
Rheological control
microgels in organic coatings, 33
Rheology
the levelling of thixotropic coatings, 89

Salt spray
optimisation of metallic pigments in coatings by an electrochemical technique and an investigation of manganese powder as pigment formetal rich primers, 271
Scanning electron microscopy
evaluation of heat resistant properties of silicone based coatings by SEM and a.c. impedance techniques, 113
SDS surfactant migration
vibrational spectroscopic study of distribution of sodium dodecyl sulfate in latex films, 279
Self-stratification
theoretical aspects of self-stratification, 155
statistical treatment of data from the European Community Research on self-stratification, 209
Self-stratifying coatings
self-stratifying coatings for metallic substrates, 167
self-stratifying coatings for plastic substrates (BRITE EURAM PROJECT RI 1B 0246 C(H)), 179
formulation parameters influencing self-stratification of coatings, 193
self-stratifying coatings — an overview of a European Community Research Project, 203
Silicone titanate resin
evaluation of heat resistant properties of silicone based coatings by SEM and a.c. impedance techniques, 113
Sol–gel precursors
differential scanning calorimetry study of linseed oil cured with metal catalysts, 251
Solubility parameters
self-stratifying coatings for metallic substrates, 167
Statistical treatment of data
statistical treatment of data from the European Community Research on self-stratification, 209
Steel coating
formulation parameters influencing self-stratification of coatings, 193
Stress
on adhesion and stress in organic coatings, 21
Surface adsorption
dispersion characteristics of magnetic particles: surface charge, surface adsorption and acid–base interaction behavior, 307
Surface analysis
stabilization of the polymer–metal interface, 9
Surface characterization
pigment dispersion in water-reducible paints, 79
surface chemistry of galvanized steel sheets relevant to adhesion performance, 227
Surface charge
dispersion characteristics of magnetic particles: surface charge, surface adsorption and acid–base interaction behavior, 307
Surface tension
theoretical aspects of self-stratification, 155
self-stratifying coatings for metallic substrates, 167

Tafel extrapolation
optimisation of metallic pigments in coatings by an electrochemical technique and an investigation of manganese powder as pigment formetal rich primers, 271
Thin layers
thin-layer technology in organic coatings, 3
Thixotropy
the levelling of thixotropic coatings, 89

Ultraviolet cured coating
acrylated lesquerella oil in ultraviolet cured coatings, 299
UNIFAC
theoretical aspects of self-stratification, 155

Water emulsions
studies on the stability of aqueous emulsions containing linseed oil and alkyd resin modified by linseed oil, 125
Wet adhesion
internal stress and wet adhesion of organic coatings, 285
Wood
acrylated lesquerella oil in ultraviolet cured coatings, 299

Zinc rich primer
optimisation of metallic pigments in coatings by an electrochemical technique and an investigation of manganese powder as pigment formetal rich primers, 271
